

## WHY CHOOSE CMHS?

- 1** **Diverse career opportunities for graduates**  
After graduation, there is a broad range of opportunities for future jobs in the field of medicine. Upon finishing medical school, you can choose to work in hospitals, science institutes, public health care providers or be part of the medical department of some other professional field.
- 2** **The ability to help people directly and make them happier**  
Most doctors would say that there is no greater joy than the one you feel when you manage to help a very sick patient or when you are part of a group of scientists who discover a new medicine for a certain disease.
- 3** **Opportunities to study abroad**  
Students are offered 4-8 week electives that involve studying abroad. Students get to experience another culture and to see how medicine is practiced in other countries.
- 4** **Get involved in cutting-edge research**  
The end of your medical studies does not mean the end of your learning. The CMHS provides its students with the chance to participate in summer research work. This can be either in the college, with senior research professors, or overseas working in well-known international laboratories. Moreover, the college provides students with opportunities to enhance their experience with Continuous Medical Education (CME).
- 5** **Status and respect in society**  
Doctors are seen as symbols of dignity, responsibility and service to the community.
- 6** **Excellence**  
UAEU is ranked in the best 400 universities in the world and is internationally accredited by WASC.
- 7** **You will learn from the best**  
Our elite team of professors and researchers have graduated from highly reputable international universities.
- 8** **State-of-the-art scientific laboratories**  
The CMHS provides its students with world-class facilities that include an imaging unit, an analytical and molecular unit, a cellular biology facility and an animal vivarium unit. There is also an animal research facility, a dissection laboratory, a medical simulation center and an evaluation and assessment center.
- 9** **Ample opportunities to get involved**  
CMHS offers a number of student clubs, organizes many field trips and has a wealth of ex-

## Master of Public Health (MPH)

### MASTER OF PUBLIC HEALTH (MPH)

The MPH program is a professional part-time advanced degree designed for medical, health and science professionals who intend to advance and lead in their career. The flexible and interest driven program allows students to develop, analyse, and implement policy plans, and evaluate health services and programs whilst catering for their individual career goals.

It is an internationally recognized qualification in public health. It provides broad academic training in public health, epidemiology, biostatistics, and healthcare management. It can lead to a career in public health practice, academic public health or epidemiology, and/or research.

### MISSION

The mission of our MPH program is to enable future leaders in public health practice to use scientific evidence to design, implement and evaluate public health issues and programs to improve the health status of communities within the UAE, Gulf Cooperation Council Countries, Middle East region, and internationally. The program is structured in a manner that responds to the constantly changing health and social issues both at local and international levels.

### WHY TO JOIN MPH?

The program is appropriate for professional working in the health and social care organizations including government departments, insurance, and healthcare services providers. This program equips professionals with the broad range of competencies needed for planning, managing, and evaluating healthcare services, health promotion, prevention, and conducting research.

Our current students and alumni come from a wide range of backgrounds including medicine, nursing, pharmacology, health education and promotion, nutrition and dietetics, health informatics, and science.

### BENEFITS FOR EMPLOYERS

The MPH program improves the skills, knowledge, effectiveness, and enables employees to fulfil a wide range of roles in public health services and management, health protection, health promotion, occupational and environmental health, and research. To accommodate the needs of student's work commitments, MPH is offered on flexible basis.

### TYPICAL DURATION (Flexibility is the key)

Study for MPH is on a flexible, part-time basis over a minimum of 2 years period.

### PROGRAM STRUCTURE

Courses are held every 2-4 weeks throughout the semester from Wednesday to Saturday (08:30-17:00). Students can make their own study plans according to their work commitments, and they would need to arrange with their employers for study leave on weekdays, i.e., Wednesday and Thursday.

### REQUIRED CREDIT HOURS

Each MPH course is weighted 2 credits, and students are required to complete a minimum of 17 courses (34 credits) to graduate.

### TUITION FEE: AED 61,400

AED 1,800 per credit (34\*1,800 = AED 61,200)  
AED 200 Application fee  
Total 61,200 + 200 = AED 61,400

### ADMISSION CRITERIA

- Comply with the General Requirements of UAE University. For more information, please visit: [www.uaeu.ac.ae/en/admission/gradudate\\_admissions.shtml](http://www.uaeu.ac.ae/en/admission/gradudate_admissions.shtml)
- Open to UAE Nationals and Non-Nationals.
- Degree in Medicine, Life Sciences or other relevant field from an accredited university recognized by the UAE Ministry of Higher Education and Scientific Research.
- Minimum Grade Point Average (GPA) is 3.0/4.0.
- A score of at least 6.0 on the IELTS academic exam or equivalent. Test score must be <2 years old at the time of application.
- Experience of working in public health or a related field will be an advantage

### APPLICATION

Apply online at: [www.uaeu.ac.ae/en/admission/apply.shtml](http://www.uaeu.ac.ae/en/admission/apply.shtml)  
Eligible MPH applicants are invited for an interview with Institute of Public Health (IPH) faculty in May.

### INSTITUTE OF PUBLIC HEALTH

The IPH houses a team of academic, scientific and support staff from various clinical and scientific disciplines with interests and expertise in the fields of public health, epidemiology, biostatistics, injury prevention, health protection, environmental and occupational health. Faculty and staff in the IPH are internationally recognized for their research, consultancy, and training capabilities in public health
